Subject: Albumin (Human) 5% Solution USP - Grifols

Dear Customer:

We are pleased to inform you that Grifols' Albumin (Human) 5% Solution, USP, DIN 02223694, will be available in Canada in a 500 mL vial size format, starting in May 2021. This product is manufactured from plasma supplied by Canadian Blood Services.

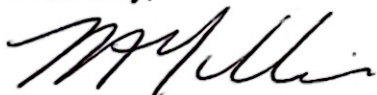

Outlined below are key attributes of Grifols' Albumin (Human) 5% Solution, USP:

- Sterile aqueous solution of 5% albumin (human) for intravenous administration.¹
- Clear, slightly viscous liquid which may range from almost colourless, to yellow, amber or green.¹
- Latex-free.
- Stabilized with sodium caprylate (0.08 mmol/g albumin) and acetyltryptophan (0.08 mmol/g albumin).¹
- Contains no preservative.¹
- Low aluminum ($\leq 200 \mu\text{g/L}$).¹
- Storage Conditions: Store at temperatures up to 30 °C. Do not freeze. Product should be used within 4 hours after the container has been entered.¹
- Please see the product monograph for indications, contraindications, warnings, precautions, adverse reactions, interactions, dosing, administration and/or conditions of clinical use.¹

We wanted to also take this opportunity to remind you that it is acceptable for Grifols' Albumin (Human) 5% Solution USP DIN 02223694 and Plasbumin®-5 DIN 02189100 to be pooled/administered together in order to complete a required dose.²

Should you have questions regarding this communication, or if you require this letter in an accessible format, please contact Grifols Medical Information at 1-866-482-5226.

Sincerely,

Martha Gillies
Sr. Director, Contract Operations, Quality & Logistics
