WinRho® SDF Labelling

Customer Letter # 2021-04

2021-01-22

Dear Colleagues:

Canadian Blood Services has been advised by Saol Therapeutics Research Ltd. of Labelling updates for WinRho® SDF. Specifically, there is an update to WinRho® SDF Product Monograph and the package insert included in the product cartons. Please note that the lot number on the product carton differs from the lot number on the vial. The number “1” is added to the carton lot number. Despite the addition of this number, both the vial label lot number and the carton lot number are compatible. The labelling updates align with [CL 2020-07](#). Please see attached letter from Saol Therapeutics Research Ltd dated 20 Jan 2021 for details.

Additionally, WinRho® SDF 120mcg (600 IU) Lot 230029561 (highlighted below) has been issued to customers. In the coming months, customers can expect the other two lots of WinRho® SDF 300mcg (1500 IU) listed below.

Drug Product	Vial label lot number	Carton lot number
WinRho SDF 120mcg (600 IU)	23002956	230029561
WinRho SDF 300mcg (1500 IU)	23002983	230029831
WinRho SDF 300mcg (1500 IU)	23002984	230029841

Please note that any required communication related to those 3 lots, will reference both the unit carton and vial lot numbers to avoid any opportunity for confusion.

The French version of this communication will follow.

Please share a copy of this customer letter with healthcare professionals at your hospital who might be interested in this information.

This customer letter can also be viewed at www.blood.ca in the “Hospitals Services” section. If you have questions about this letter, or if you require it in an accessible format, please contact your local hospital liaison specialist.

Sincerely,

Mark Newburgh
Director, Integrated Supply Chain Planning
